

NOTTINGHAM

Mechanical and Electrical Consulting Engineers

www.nottingham-mep.com

Passion | Integrity | Commitment

We build a concept & then structure it.

It is our pleasure to introduce Nottingham Mechanical & Electrical Consulting (NMEC); a full interdisciplinary Consultancy with proven capabilities in major building.

We have a long record of providing quality, cost-effective, professional Engineering Consultancy. Our specialized Mechanical, Electrical and Plumbing (MEP) services have catered to a vast array of applications including Commercial, Residential, Institutional, Recreational and Industrial.

We would like to take this opportunity to extend our gratitude towards our business partners and clients for their continued support throughout our journey. Thanks to them and our dedicated staff, NOTTINGHAM was able to achieve outstanding results in all the ventures it undertook and carved a niche for itself in the construction industry.

To our clients and partners, We at NOTTINGHAM assure total commitment to quality service and innovation.

Our expert engineers are our strength.

Experts in BIM & Revit Modeling

What we do

Our services consist of the design and supervision of Mechanical and Electrical systems, Installations for buildings and specialized facilities. This includes Feasibility studies, investigative reports, conceptual designs, cost estimates with analysis, production specifications and bills of quantities, bids evaluation with recommendation, contract negotiations, detailed designs and working drawings, project management, supervision and site management.

By discipline, the services are as detailed below:

Electrical

- ✦ High and Medium Voltage Substations
- ✦ High Voltage / Low Voltage Distribution Networks
- ✦ Power Generation
- ✦ Uninterrupted Power Supply Systems
- ✦ Utility and Small Power Distribution Systems
- ✦ Lighting Design and Control Systems
- ✦ Fire Detection and Alarm Systems
- ✦ Earthing & Lightning Protection Systems
- ✦ Building Management Systems
- ✦ Telephone and Data Communication Systems
- ✦ Television and Radio Distribution Systems
- ✦ CCTV and Security Systems
- ✦ Intercom System
- ✦ Intelligent Building System and Home Automation
- ✦ Hotel Interactive TV Systems
- ✦ Guest Room Management Systems
- ✦ Metering System

The Nottingham team are very motivated and possess many strengths which include:

- Attention to detail
- High regards for sustainable and efficient design
- Technically proficient
- Effective quality focus

Mechanical

- ⚙ Heating, Ventilation & Air Conditioning Systems
- ⚙ Water Distribution Network
- ⚙ Drainage Systems
- ⚙ Fire Protection and Suppression Systems
- ⚙ Sewage Treatment Plants
- ⚙ Water Treatment Plants
- ⚙ Irrigation Systems
- ⚙ LPG and Natural Gas Distribution Systems
- ⚙ Systems for Medical and Laboratory Gases
- ⚙ Compressed Air System

District Cooling & Infrastructure Systems

- ⚙ Conventional Central Chilled Water Plan
- ⚙ District Cooling Plants
- ⚙ Modular Chilled Water Plants
- ⚙ Reticulation Chilled Water Piping Network
- ⚙ Energy Transfer Stations (ETS)
- ⚙ Pumping Stations
- ⚙ Mechanical & Electrical Infrastructure Services
- ⚙ Reverse Osmosis Plants (Ro)

We cater to a number of different types of projects including:

- Commercial and Residential Buildings
- Housing Complexes
- Hotels & Resorts
- Education Facilities
- Hospitals
- District Cooling Plants, Reticulation lines and Energy Transfer Stations.
- Shopping Centers
- Palaces
- Industrial Projects

DISTRICT COOLING & INFRASTRUCTURE SECTOR

DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

Sector Overview

The district cooling industry is rapidly evolving as it correlates with the construction growth in the region. The trend has shown a speedy shift from traditional air-conditioning facilities, to advanced district cooling systems that reduce energy costs, maintenance costs and mitigate environmental damages. Master planners are increasingly considering the long-term benefits of such systems and governments are incorporating necessary infrastructure developments for its efficient implementation and usage. We offer customized optimum solutions in this field and we are actively seeking technologies to lower end users' utility costs and inflect minimal environmental impact of the deployment of district cooling facilities.

DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

Engineering Capabilities

Our dedicated and skillful engineers utilize proven and reliable, environmentally friendly cooling technology. We control conditions through advanced monitoring systems at district cooling sites. Our design structure incorporates early warning systems and operational systems that are designed to proactively respond to unexpected changes and technical reviews. Our services secure significant long-term decrease in operating and maintenance costs and avoid the developers' major capital expenditures and ensure reduced peak electrical demand while flattering overall electrical loads.

We Offer

Engineering Capabilities Include:

- ✧ Complete design work for district cooling systems including cooling plant, reticulation lines, and energy transfer stations
- ✧ Complete design work for MEP infrastructure systems

- ✧ Design works for pump stations
- ✧ Design works for electrical substations
- ✧ Review designs done by others and preparing shop drawings
- ✧ Value engineering

DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

NOTTINGHAM Mechanical and Electrical Consulting Engineers moves forward to meet the challenges of the 21st century, the company ensures that the software technology powering design and development, not only keeps up with industry standards, but also leads it. NOTTINGHAM prides itself on the technical prowess, with a dedicated technology program that employs the latest software and hardware to quickly identify problems as well as design solutions to remove them. Such software includes for stress analysis, hydraulic analysis and electrical analysis (etab).

Modern Software design enable NOTTINGHAM to undertake powerful 3D plant designing and modeling tools which creates better visualization and enables the design team to develop very complicated plants.

The industry standard 2D and 3D drafting tools allow for conceptual design, model documentation, and reality capture as well as enhance building performance design, simulation, and energy certifications.

DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

Delivered Projects by Nottingham Management

NOTTINGHAM Management had successfully delivered mega projects in UAE and gulf region in the field of District cooling and Infrastructure which considered as landmarks in this field such as:

- Jumeirah Beach Residence District Cooling System 60,000 TR, Dubai - UAE
- Motor City District Cooling Plant 100,000 TR, Dubai - UAE
- Festival City District Cooling Plant, 50,000 TR, Dubai - UAE
- Meydan Race Course Central Plant 40,000 TR, Dubai - UAE
- Khalifa City District Cooling Plant, 25,000 TR Abu Dhabi – UAE
- Adnoc District cooling plant, 20,000 TR, Abu Dhabi - UAE
- Doha Land District Cooling Plant, 30,000 TR, Doha - Qatar
- Information Technology and Communication Centre District cooling Plant, 35,000 TR, Riyadh - KSA
- Hadeed District Cooling, 25,000 TR Jubail – KSA
- Dubai Investment Park Chilled water network, 80,000-meter piping, Dubai – UAE
- Dubai Festival City chilled water network, 45,000 Meter piping, Dubai – UAE
- Jumeirah Beach chilled water piping network, 38,000 Meter piping, Dubai – UAE
- Khalifa city – A complete infrastructure services – Abu Dhabi – UAE
- Dorat Al-Bahrain district cooling system – 60,000 TR – Bahrain.
- Emirates City District Cooling System – 80,000 TR – Ajman – UAE

DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

Executed Projects

Nottingham had successfully delivered district cooling projects with the MEP contractor. The scope of Nottingham was:

- Review of the design
- Preparing shop drawings
- Carry out the necessary engineering studies
- Prepare value engineering

Our Services

We develop and implement unique solutions and alternatives to assist owners bring about sustainable changes.

Concept, Modelling, Analysis, Detailed Design, Planning Benchmarking, Optimization & Peer Review

Design

Engineering, Procuring, Execution, Documenting & Commissioning + Turn-key Solutions with Financing (DBFO)

Construction

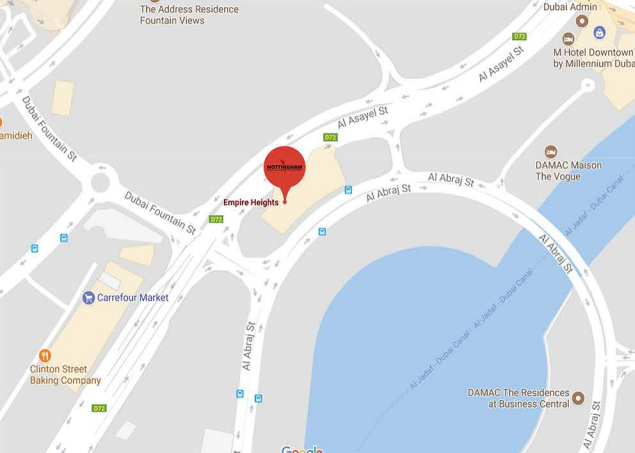

Audits, AFDDI™, Asset + Energy & Demand Management ΔT Correction, Sub Metering and Billing

Operations

We help strengthen our clients brand by enhancing their customers experience, reducing costs, protecting the environment and improving the return of the development.
