Passion|Integrity|Commitment

**Fadi Mustafa**  
Founder & GM

NOTTINGHAM Mechanical & Electrical Consulting Engineers was established in 2010. NOTTINGHAM operates as a comprehensive interdisciplinary consultancy with a proven track record in significant construction projects.

The company has a rich history of delivering high-quality, cost-efficient, and professional engineering consultancy services. NOTTINGHAM specializes in Mechanical, Electrical, and Plumbing (MEP) services, catering to a wide range of applications such as Commercial, Residential, Institutional, Recreational, and Industrial projects.

We would like to express our sincere gratitude to our valued business partners and clients for their unwavering support throughout our journey. Their continuous collaboration, combined with the dedication of our staff, has enabled NOTTINGHAM to achieve remarkable outcomes in all our endeavours, establishing a prominent position within the construction industry. To our esteemed clients and partners, we assure an unwavering commitment to delivering services of the highest quality and embracing innovative approaches.

## What we do

Our services consist of the design and supervision of Mechanical and Electrical systems and installations for buildings and specialized facilities. This includes feasibility studies, Investigative reports, conceptual designs, cost estimates with analysis, production specifications and bills of quantities, bids evaluation with recommendation, contract negotiations, detailed designs and working drawings, project management, supervision and site management.

By discipline, the services are as detailed below:

### Electrical

- High and Medium Voltage Substations
- High Voltage/Low Voltage Distribution Networks
- Power Generation
- Uninterrupted Power Supply Systems
- Utility and Small Power Distribution Systems
- Lighting Design and Control Systems
- Fire Detection and Alarm Systems
- Earthing & Lightning Protection Systems
- Building Management Systems
- Telephone and Data Communication Systems
- Television and Radio Distribution Systems
- CCTV and Security Systems
- Intercom System
- Intelligent Building System and Home Automation
- Hotel Interactive TV Systems
- Guest Room Management Systems
- Metering System

## Mechanical

- ⚙ Heating, Ventilation & Air Conditioning Systems
- ⚙ Water Distribution Network
- ⚙ Drainage Systems
- ⚙ Fire Protection and Suppression Systems
- ⚙ Sewage Treatment Plants
- ⚙ Water Treatment Plants
- ⚙ Irrigation Systems
- ⚙ LPG and Natural Gas Distribution Systems
- ⚙ Systems for Medical and Laboratory Gases
- ⚙ Compressed Air System

## District Cooling & Infrastructure Systems

- ⚙ Conventional Central Chilled Water Plan
- ⚙ District Cooling Plants
- ⚙ Modular Chilled Water Plants
- ⚙ Reticulation Chilled Water Piping Network
- ⚙ Energy Transfer Stations (ETS)
- ⚙ Pumping Solutions
- ⚙ Mechanical & Electrical Infrastructure Services
- ⚙ Reverse Osmosis Plants (Ro)

## Key Clients :

# Hospitality and Leisure

Anantara Hotel

Project:	Hotel & Serviced Apartments

DISTRICT COOLING & INFRASTRUCTURE SYSTEMS  
Engineering Capabilities

Our dedicated and skillful engineers utilize proven and reliable, environmentally friendly cooling technology. We control conditions through advanced monitoring systems at district cooling sites. our design structure incorporates early warning systems and operational systems that are designed to proactively respond to unexpected changes and technical reviews. Our services secure significant long-term decrease in operating and maintenance costs and avoid the developers major capital expenditures and ensure reduced peak electrical demand while flattering overall electrical loads.

We Offer

Engineering Capabilities Include:

- ⚡ Complete design work for district cooling systems including cooling plant, reticulation lines, and energy transfer stations
- ⚡ Complete design work for MEP infrastructure systems

- ⚡ Design works for pump stations
- ⚡ Design works for electrical substations
- ⚡ Review designs done by others and preparing shop drawings
- ⚡ Value engineering

## DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

NOTTINGHAM Mechanical and Electrical Consulting Engineers moves forward to meet the challenges of the 21st century, the company ensures that the software technology powering design and development, not only keeps up with industry standards, but also leads it. NOTTINGHAM prides itself on the technical prowess, with a dedicated technology program that employs the latest software and hardware to quickly identify problems as well as design solutions to remove them. Such software includes for stress analysis, hydraulic analysis and electrical analysis (etab).

Modern Software design enable NOTTINGHAM to undertake powerful 3D plant designing and modeling tools which creates better visualization and enables the design team to develop very complicated plants.

The industry standard 2D and 3D drafting tools allow for conceptual design, model documentation, and reality capture as well as enhance building performance design, simulation, and energy certifications.

## DISTRICT COOLING & INFRASTRUCTURE SYSTEMS

### Delivered Projects by Nottingham Management

NOTTINGHAM Management had successfully delivered mega projects in UAE and gulf region in the field of District cooling and Infrastructure which considered as landmarks in this field such as:

- Jumeirah Beach Residence District Cooling System 60,000 TR, Dubai - UAE
- Motor City District Cooling Plant 100,000 TR, Dubai - UAE
- Festival City District Cooling Plant, 50,000 TR, Dubai - UAE
- Meydan Race Course Central Plant 40,000 TR, Dubai - UAE
- Khalifa City District Cooling Plant, 25,000 TR Abu Dhabi - UAE
- Adnoc District cooling plant, 20,000 TR, Abu Dhabi - UAE
- Doha Land District Cooling Plant, 30,000 TR, Doha - Qatar
- Information Technology and Communication Centre District cooling Plant, 35,000 TR, Riyadh - KSA
- Hadeed District Cooling, 25,000 TR Jubail - KSA
- Dubai Investment Park Chilled water network, 80,000-meter piping, Dubai - UAE
- Dubai Festival City chilled water network, 45,000 Meter piping, Dubai - UAE
- Jumeirah Beach chilled water piping network, 38,000 Meter piping, Dubai - UAE
- Khalifa city - A complete infrastructure services - Abu Dhabi - UAE
- Dorat Al-Bahrain district cooling system - 60,000 TR - Bahrain.
- Emirates City District Cooling System - 80,000 TR - Ajman - UAE

Passion | Integrity | Commitment
